

Dishwashing Liquid testimonials:

I am constantly amazed at the power of the Norwex Dishwashing Liquid when I use it in with laundry! Today, it took fresh strawberry juice COMPLETELY out of little Lilly's cotton/linen WHITE capris!!! (NO pre-treating either!) I thought they would be ruined. I have always put a small squirt right in the washing machine since she was born and never had stains from formula or spit-up! If that's not proof of a great product, I don't know what is. I have recommended it to all my expectant and new mom friends.

Katie from Minnesota, USA

My son came back from camping and when he added his clothes to the wash, he said...OH Yah...this white polo shirt may need something extra to get the mud stains out (almost every area of the shirt had dry mud stains on it...collar, sleeves, front and back). I showed him how to put the NORWEX DISHWASHING LIQUID on spots waited a few minutes and noticed that the stains had started to come out already. We scrubbed a little and put the shirt in the wash. He was pleased to see that his white polo shirt came out good as new!!!
