

Window Cloth:

My sister loves using the Window Cloth after a damp Enviro Cloth to polish her granite countertops. This leaves the countertops shiny without the dull residue that used to be left behind from traditional cleaners. I also find the Window Cloth works great on stainless steel appliances. My husband has patients who are farmers and recently, a farm wife complained to him that her husband "stole" her Window Cloths for his combine windows! He says they work great and now nothing "sticks" to his windshield! We, also, have a neighbour who works in the gold drilling business (in Alaska and Nevada) and he LOVES using a wet Enviro and the Window Cloth for his truck windows and inside the truck as their vehicles get black inside from all the dust and dirt.

Dusting Mitt:

I love using 2 Dusting Mitts at a time each time I dust! It's much faster and easier to pick up things with both hands like knick knacks, photo frames and you have no thumb print left behind! I have also found using one on each hand is an easier way to clean spindles on stair cases, dining chairs, ceiling fans, wooden blinds or plastic blinds, dusting lamp shades (especially those upside-down bowl shaped ones!). Using a Mitt on each hand is also a great way for gently dusting plant leaves! The Dusting Mitt is great for electronics, TV's, computer screens (which collect so much dust), dusting leather furniture or inside your vehicle, the dash board especially. The Dusting Mitt simply makes dusting easy!
